DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor suggest, in the claimed combination, an electromagnetic apparatus with a sliding plunger wherein either one or both of at least an outer peripheral wall of a plunger and at least an inner peripheral wall of an accommodating portion forms a magnetic portion made of nickel phosphide, and the phosphorus content of the magnetic portion is set with in range of greater than 10% to less than or equal to 15% in mass. As stated by Applicant in pages 5 and 6 of the response, this range provides a balance between magnetic attractive force and smooth sliding movement of a plunger in an accommodating portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
